

YOUR SAFETY IS OUR PRIORITY.

Delta's number one priority is always the safety of our customers and employees.

At Delta, we pride ourselves on delivering a superior customer experience. Integral to that experience is providing a safe and comfortable environment for our customers and employees. We are in constant contact with the CDC, WHO and other health organizations to ensure we follow, and in many cases exceed, their guidance on health precautions related to COVID-19.

Delta maintains high standard for cleaning and disinfecting our aircraft. Here is a look at what we are doing behind the scenes to prevent the spread of COVID-19.

ON THE GROUND

Delta Sky Club and Gate Cleaning Measures

Ongoing cleaning procedures throughout the day, with a **full sanitation** each night after closing

International Biometric Boarding

Our optional international biometric boarding is based on photo and facial recognition. **No fingerprint** scan necessary

ONBOARD

High-grade, EPA-registered Disinfectant Used On All Flights

Used in all aircraft cleaning procedures including common surface areas in galleys and lavatories

19-Point Checklist for Cabin Cleanliness on Transoceanic Flights

Disinfecting cabin surfaces and customer contact areas such as seats, seatback pockets, tray tables and floors with our **high-grade, EPA-registered disinfectant**, which is rated to combat many communicable diseases

Disinfection

Deploying a fogging technique with a highly-effective, EPA-registered disinfectant on all trans-Pacific and trans-Atlantic inbound flights

Additional Measures for U.S.-bound flights from Asia

Inbound linen and headphones are being segregated and **washed/sanitized/disinfected separately** from other linen and headphones. All unused inbound supplies are being discarded

Customer Care Conveniences

All customers on long-haul international flights are provided with amenity kits, which contain **hand sanitizer or cleansing towelettes**

Lavatory Tidy Kits

Pre-packaged lavatory cleaning supplies including gloves, disinfectant wipes, a mini-mop with handle, a trash bag and a device for trash pickup; available on many international and transcontinental flights

AIR QUALITY

State-of-the-art Air Circulation Systems¹

Blend fresh outside air that is sterilized with a high-temperature compressor and ozone purifier with existing cabin air that has been recirculated through an **industrial-grade HEPA filter**

Industrial-grade HEPA filter

HEPA air filters extract more than **99.999% of even the tiniest viruses**, as small as 0.01 micrometers, and can filter out coronaviruses specifically as they range from 0.08 to 0.16 micrometers in size

CATERING

Tableware Sanitization

All tableware, dishes, cutlery and glassware are **sanitized and disinfected** before washing

Catering Equipment Sanitation

Sanitation fogger systems to be used at **each international gateway** catering location to sanitize inbound catering equipment and supplies

Additional Gloves

Glove provisioning has been increased for crew usage—**more than 100 pairs** available on every international flight

KEEP CLIMBING

¹All international wide bodies and many narrowbodies including 737s, 757s, A220s, A319s, A320s, A321s and A350s
